Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Embodiment 1, shown in fig. 12 (claims 37-39, 54 and 55) is acknowledged. However, Applicant is reminded that claims 54 and 55 were previously withdrawn -- please refer to "Reply to Restriction Requirement" dated 12/1/2003.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 37 and 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Hansen et al. ("Hansen") USPN 6,348,995.

Hansen discloses fig. 5 a polarizer 45 comprising a plurality of moth-eye 46 (spacing or period is shorter than the wavelength) or a plurality of subwavelength optical (as in claim 38) microstructures disposed on one another.

4. Claims 37-39 are rejected under 35 U.S.C. 102(a) as being anticipated by Kawakami et al. ("Kawakami") (WO 00/08496).

Kawakami discloses in figs. 1, 2 and 5 a polarizer (1, 2) comprising a plurality of moth-eye or a plurality of subwavelength optical (as in claim 38) microstructures disposed on one another.

As for claim 39, the specification contains no disclosure of either the critical nature of the claimed arrangement or any unexpected results arising therefrom. Where patentability is said to be based upon particular chosen dimensions or upon another variable recited in a claim, the applicant must show that the chosen dimensions are critical. In re Woodruff, 919 F.2d 1575, 1578, 16 USPQ2d 1934, 1936 (Fed. Cir. 1990).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouderkirk et al. ("Ouderkirk") USPN 6,262,842 in view of Hansen et al. ("Hansen") US PG-Pub 2002/0015135.

Ouderkirk discloses fig. 2 a polarizer 8 comprising a plurality of microstructures (2, 4) including at least 40 microstructures (as in claim 39) disposed on one another, but does not specifically disclose a plurality moth-eye or a plurality of subwavelength optical microstructures.

Hansen discloses in fig. 9 a plurality moth-eye or a plurality of subwavelength optical microstructures.

Art Unit: 2826

Therefore, it would have been obvious to one skilled in the art at the time the invention was made to incorporate Hansen's teachings with Ouderkirk's device since that would provide greater luminous efficacy as taught by Hansen.
